

DEFINITIONS

ATTENTION:	TECH DICTIONARY
ATTENTION UNIT:	TECH DICTIONARY
THETAN (0n):	TECH DICTIONARY
BODY THETAN (BT):	By BT is meant a thetan who is stuck to another thetan or body but is not in control (HCOB 5.2.70, Iss. II.) BTs stick to pictures, other BTs and clusters. A BT can go into a valence of anything - BTs can be being anything at all.
CLUSTER;	A cluster is a group of body thetans (BTs) crushed or held together by some mutual bad experience. (HCOB 5.2.70, Iss. II.) The mutual incident is a heavy engram which happened to all the thetans in the cluster and is the exact point in time and space where they "became one".
MUTUAL INCIDENT:	A severe engram which happened to a number of thetans, the picture (which they have in common), keeps them stuck together in that incident. It has a precise date down to the second and fractions of a second and a precise location in space.
CUMULATIVE CLUSTER:	A cumulative cluster is made up of other earlier clusters (see HCOB 29.10.69R for illustration). It is a cluster to which other BTs and clusters have been added by later mutual incidents, all stuck together.
COMPOSITE (MASS):	(See English Dictionary.) Used on this RD to describe masses or heavy somatics made up of a number of BTs, clusters, pictures, ridges.

LAYERED CLUSTER:	Several clusters (and/or BTs) in layers, as one layer comes off another layer comes to view.
SHELL BT:	A BT or cluster that surrounds the Pre-OT's body like a shell. A Clear can go into the valence of, and see the pictures of, this BT or cluster and mistake these as his own, as he seems to be in valence in the picture.
DORMANT BT:	A BT or cluster in a totally dormant condition, they're really dead, in states of existence below unconsciousness. They are out of PT (stuck on the track) and are stuck in the past location. They are in a perpetual reviv in that time and that location. They can be activated or awoken by the Pre-OT.
COPY:	Thetans in the body (BTs) may obsessively copy the pictures of other thetans. Therefore you can find it seems that the thetan who just left is still there because there is a picture left. Spot the fact that someone else copied it and it usually goes. (Add. sheet, Sect. III OT.)
CROSS-COPYING:	When a number of BTs and clusters are restimulated or awoken, each can start making copies of each other's pictures and copies of the copies - called cross-copying.
CROSS-RESTIMULATION:	One BT or cluster restimulating another BT or cluster, who then restimulates another BT or cluster.
MISCONCEPTION:	(See English Dictionary) and Axiom 38. The basic misconceptions are of identity, time, place, form and event; e.g. a misconception of place would be a thetan thinking something that happened in one place, happened in another place. A misconception of event would be a thetan thinking something

happened to him, which didn't happen to him or happened to someone else (Flow 2 or 3).

MISOWNERSHIP: A basic misconception of one thetan making the mistake of thinking another thetan's picture or incident or mock-up is his own.

MISIDENTIFICATION: A basic misconception of one thetan thinking he is another thetan. It's a mistake in identity. Thetan "A" thinks it is thetan "B". Or one thetan thinks he is more than one thetan, etc.

VALENCE: TECH DICTIONARY

BEINGNESS: TECH DICTIONARY

IDENTITY: See English Dictionary and Tech Dictionary under "valence" and "beingness". It is that by which a thetan identifies himself.

OUT OF VALENCE: TECH DICTIONARY

BLOW: See Tech Dictionary. In this RD it is used in the sense of a BT or cluster departing after being unstuck from other BTs and clusters.

PARTIAL BLOW: A BT or cluster not fully blown. Sometimes one will leave from inside the body and stick or hang up on the outer surface of the body. Or one will go as far as the wall or to some distance and hang around.

BLOWING BY INSPECTION: You don't have to do anything, you just look and it blows.

PICTURE: See Tech Dictionary under "Mental Image Picture".

MOCK UP: TECH DICTIONARY

SOMATIC: TECH DICTIONARY

RIDGE: TECH DICTIONARY

TIME TRACK:

TECH DICTIONARY

REVIV (REVIVIFICATION): The bringing back to life of an engram in which a pc is stuck. The engram or some portion there of is being acted out in present time by the preclear. It is called a revivification because the engram is suddenly more real to the preclear than present time has ever been. He relives that moment briefly. He does not merely recall or remember it. (HCOB 11.5.65) During research on NED for OTs I discovered that Dormant BTs are stuck in a reviv, i.e. they are stuck down the track in an incident which is present time to that BT. I also discovered that these BTs are reviv'd in a location, meaning that they are stuck in a past location. They are chronically stuck in a past time and place, which for them is still going on. It is "PT" and is where they are, as far as they are concerned.

INSECT:

ON OT III "insect" means a thetan who is an insect, without a body. These stick to other BTs and clusters. Sometimes you can run into a whole swarm of them.

BIRD:

Similar to above - a thetan who is a bird, without a body, and sticking to other BTs and clusters.

ANIMAL:

Similar to above - a thetan who is an animal, without a body, sticking to other BTs and clusters.
