Transcript of LRH OT III Instructions

The head of the Galactic Federation (76 planets around larger stars visible from here) (founded 95,000,000 years ago, very space opera) solved overpopulation (250 billion or so per planet, 178 billion on average) by mass implanting. He caused people to be brought to Teegeeack (Earth) and put an H-Bomb on the principal volcanos (Incident II) and *then* the Pacific area ones were taken in boxes to *Hawaii* and the Atlantic area ones to *Las Palmas* and there "packaged".

His name was Xenu. He used renegades. Various misleading data by means of circuits etc. was placed in the implants. When through with his crime loyal officers (to the people) captured him after six years of battle and put him in an electronic mountain trap where he still is. "They" are gone. The place (Confederation) has since been a desert.

The length and brutality of it all was such that this Confederation never recovered. The implant is calculated to kill (by pneumonia etc) anyone who attempts to solve it. This liability has been dispensed with by my tech development.

One can FREE WHEEL through the implant and die unless it is approached as precisely outlined. The "freewheel" (auto-running on and on) lasts too long, denies sleep etc and one dies. So be careful to do only Incidents I and II as given and not plow around and fail to complete one thetan at a time.

On December 1967 I knew somebody had to take the plunge. I did and emerged very knocked out, but alive. Probably the only one ever to do so in 75,000,000 years. I have *all* the data now, but only that given here is needful.

One's body is a mass of individual thetans stuck to oneself or to the body.

One has to clean them off by running Incident One then Incident Two. It is a long job, requiring care, patience and good auditing.

You are running beings. They respond like any preclear. Some large, some small.

Thetans believed they were *one*. This is the primary error.

Good luck.

.

Additional Tech Data

There are *no* body thetans that cannot be audited and exteriorized.

1. There are Suppressive Body Thetans who require Power Processes.
2. There are difficult Body Thetans who require 0 to VI processes before they can run engrams (Inc 1 & Inc 2).
3. There are Pre OTs that are insufficiently trained and who cannot audit and who ARC break or overrun Body Thetans or who cannot do Academy Level 0 - IV auditing much less Level VI auditing.
4. There are clusters of Body Thetans who think they are one Body Thetan and so can't run Inc 1 or Inc 2 as a group as they have differences.

(1) **SP Body Thetans:**

An SP by definition is *one who is out of valence in R6*. Some are just plain psychotic and SP as well. PrPr 6 handles any SP, pc or body thetan.

This can best be done, by actual test, by the OT being an SH or AO Class VII. It can possibly be done (no test ever made) by having a Class VII audit the OT who relays the commands to and answers of the body thetan to the auditor, the OT being on a meter; the meter will respond to the body thetan if the OT is putting attention on the body thetan. This *has* been done with the ordinary body thetans. It simply handles the body thetan on a via.

When PrPr VI has been run on the body thetan to its end phenomenon, the body thetan can be handled as an ordinary pc body thetan as in 2 below.
.

(2) **Difficult Body Thetans:**

Some body thetans are difficult cases. They are psychotic, or they have fixed ideas or service facs.

To handle, one really should be a Class VII. However, an OT on Sect III can be used as a relay to and from the body thetan and audited by a Class VII. There is no substitute for being a SHSBC graduate and a Class VII Interne.

Only Standard Scn Tech is used, no tricks needed. The auditing is fast. The needle seldom floats on the body thetan and the TA tends to start high and come down.

When the body thetan has been pushed up to IV (grade Four) he can usually run engrams and can be run on Incidents 1 and 2 and will blow.

The trouble with a difficult body thetan is that he (or she) has some fixed idea which inhibits his recovery. This responds to ordinary tech, taking him up through the grades.
.

(3) **Insufficiently trained OTs:**

Some students try to run engrams like Clearing Course materials or make other errors because they are just not well trained.

Such should knock off III and do a Dianetics Course at least or even the SHSBC. If they still have trouble they should intern as Class VIIs.

THE MAIN SOURCE OF FAILURE IN SECTION III IS NOT STRANGE THETANS OR HIDDEN SPs, BUT STUDENTS WHO CAN'T AUDIT.

It is east to blame the "difficult body thetan" when the truth is that one should be a better auditor.

Sect III can be left incomplete while the student is trained better—*providing* he does not fool about with his own case while being trained but, now trained, recommences Section III.

One has to be able to do S&Ds on body thetans, has to find ARC breaks, etc, the lot, where one has trouble with Sect III.

The number of body thetans a case has varies widely.

The answer with consistent trouble with III is not unusual solutions for body thetans but just a better trained student. Body thetans are just thetans.
.

(4) **Clusters of Body Thetans:**

THE ONLY KNOWN DIFFERENCE between auditing body thetans and auditing pcs (and it is not a real difference as some pcs are a total cluster) is that body thetans can come in clusters.

Then Inc 1 won't run on the cluster as each individual thetan in the cluster has a different viewpoint and received Inc 1 as an individual, and not as a cluster.

A CLUSTER HAS A MORE RECENT MUTUAL EXPERIENCE WHICH HAPPENED TO THE WHOLE CLUSTER.

The error they make is the basic error of thetans. They think we are all ONE, whereas, we are individuals.

To detect a cluster
(A) There is a force or pressure or heavy somatic in an area
(B) Or, there is a "thetan" who can't erase Inc 1 or 2. This means there are several thetans who think they are one thetan,

To remedy this situation:
(1) *Date* a mutual incident for the cluster to find the point they "became one". Usually one gets this easily.
(2) *Locate* where it occurred in terms of planet and star (or even planet, star, town and place in the town.)
(3) *List* for a type of incident and find what it was (lightning, psychiatric shock, etc).
(4) *Run* the incident as a single engram.
